

Bumper[®], dock fender

Whether you sail shorthanded or singlehanded, whether you are a beginner or a confirmed skipper, the Bumper will take away some "emotional" moments when approaching the pontoon, in particular when the wind blows hard and currents are unkind !

The Bumper is a really efficient fender, to be fixed on the pontoon ; according to its location, it provides efficient protection to the bow and amidships. Suitable for all pontoon or catway shapes : square or round end pontoon. Sturdy construction, from rotomoulded PVC, UV-ray protected. Registered design.

Max. pressure :
0.10 bar / 1.45 psi

The Bumper filled with foam is ideal for boats from 9 m and is also recommended for very busy pontoons (such as the technical pontoon : fuel and water intake...).

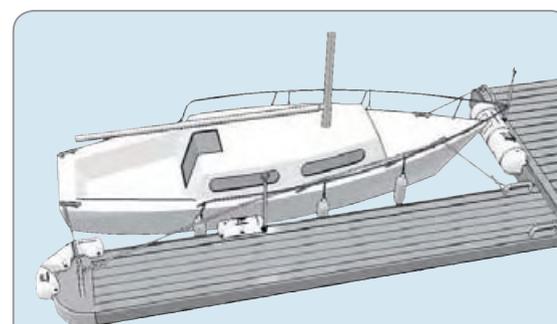

Bumper[®] 3/4

Model	BUMPER standard			BUMPER foam-filled	
	White	Blue	Grey	White	Blue
Ø 18 x 40 cm	38082	39357	-	-	-
Ø 25 x 90 cm	30102	37781	36856	37783	37784

Bumper[®] 1/2

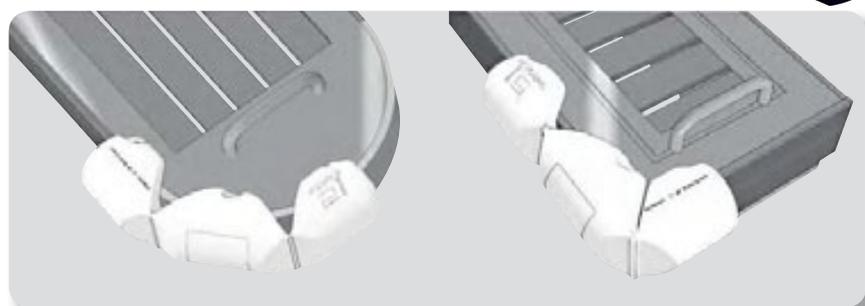

Model	BUMPER standard		BUMPER foam-filled
	White	Blue	White
Ø 18 x 40 cm	38558	39358	-
Ø 25 x 90 cm	38068	39356	39362

A bow Bumper really facilitates dock manoeuvres, and a second Bumper amidships protects efficiently against shocks.

Articulated Bumper[®]

Model	White	Blue
Ø 18 x 80 cm	39146	39359

The Bumper can be secured with screws on the pontoon.
